e-Ordering

You can efficiently order LifeVest, or renew an existing medical order, through the LifeVest Network’s e-Ordering interface. Once submitted, the LifeVest medical order is transmitted directly to ZOLL for processing.

The e-Ordering functionality allows for coordination of efforts of the clinical staff (e.g., upon direction from a physician, a staff member may enter information into the online medical order form, attach proper documentation, and forward to the prescriber for review and electronic signature.)

Contact ZOLL 24 hours a day, 7 days a week

For LifeVest customer support, technical support or medical orders, please call 800.543.3267

LifeVest medical orders and supporting documentation can be faxed to 866.567.7615

For more LifeVest information, please visit www.zoll.com or email LifeVest.Info@zoll.com

Access LifeVest patient data and e-Order through LifeVestNetwork.Zoll.com

*When the rhythm meets heart rate and morphology criteria, or through a patient initiated recording.
The LifeVest Network
Patient Data Management System

The LifeVest® wearable cardioverter defibrillator (WCD) is a proven therapy for patients at risk of Sudden Cardiac Death (SCD) and provides a connection to your patient’s changing cardiac condition through the LifeVest Network.

The LifeVest Network is ZOLL’s online patient data management system that allows clinicians to monitor patient data downloaded from a patient’s LifeVest WCD. The LifeVest Network enables you to have access to the most current information about your patient during their recovery after a cardiac event.

Data captured by the patient’s LifeVest device is transmitted to the secure LifeVest Network website where it is archived for review. Information on the LifeVest Network can be accessed anytime from almost anywhere.
The LifeVest Network

Customizable
The LifeVest Network allows you to monitor your patients efficiently and has been designed to fit seamlessly into your practice. You can customize the way you view and are notified of patient events recorded by the patient’s LifeVest device.

Flexible and Fast
Utilizing powerful and flexible software technology, the LifeVest Network allows you to easily and quickly obtain LifeVest patient data. Prescribers of LifeVest also have the option of assigning access to other clinicians in their practice to take a more active role in reviewing LifeVest patient data.

Patient Management Features

Efficiently Triage LifeVest Patients
The LifeVest Network allows you to customize the way you view and are notified of patient events recorded by the patient’s LifeVest device.

The Dashboard allows for efficient evaluation of patient data.

Tailor Alerts
The LifeVest Network gives you additional options to determine what types of LifeVest patient information necessitate an alert. You can choose to be notified for events such as:

- Treatments
- Patient Recorded ECG
- Detected arrhythmia where no treatment was given (e.g., short run of VT)

Set Notifications
Physicians and clinicians can also decide how they, or their delegate, wish to receive notifications whether by phone, fax, SMS, and/or email, as well as the times of day they would like to receive these notifications (e.g., different settings for office hours and after-hours).
ECG Review

ECG recordings automatically recorded by LifeVest or manually captured by the patient provide additional information that can be used to decide future care paths.

ECG information captured by LifeVest can help you diagnose:

- Sustained VT/VF
- Non-sustained VT
- Atrial arrhythmias/SVT*
- Severe bradycardia/Asystole

Trends

LifeVest Network Trends provides you with continuous insight into your patients’ health status and response to therapy during the early period after a cardiac event, offering information that you can use to optimize their care.

Information about your patient is trended over time, indicating when a change in their status may require your action.

Heart Rate

Heart rate displayed as weekly, daily, or five-minute averages

Activity Measures

- Patient activity (steps taken)
- Body position
- Body angle while at rest

Health Survey

The optional Health Survey allows you to select up to 12 questions that your patients can answer through the LifeVest’s touchscreen display.

WalkTest™

You can prescribe an optional six minute walk test. The LifeVest monitor will guide your patient through the test using the LifeVest’s touchscreen display. Answers to pre/post walk questions, distance walked, and heart rate are displayed.
